Spanish
Native

English
B1 Professional Working Proficiency

PRODUCT FOCUS

Comfortable working across frontend, backend integrations, deployment, and automation workflows in startup-style environments.

PROFESSIONAL EXPERIENCE

Frontend Developer

QUCHARA

May 2023 - Feb 2024 | Barranquilla, Colombia

- Developed and maintained a React Native mobile application for iOS and Android platforms.
- Converted 15+ high-fidelity designs into responsive, user-friendly interfaces.
- Collaborated with backend developers and designers to implement new product features.
- Improved application performance, reducing load times by approximately 30%.
- Helped increase user engagement and app adoption through UI improvements and feature delivery.

Frontend Developer

M&D ELECTRONIC

Jan 2022 - Mar 2023 | Barranquilla, Colombia

- Built responsive web interfaces using React.js.
- Refactored reusable components, improving maintainability and development speed.
- Integrated frontend applications with REST APIs.
- Worked closely with client requirements to improve usability and interface consistency.

INDEPENDENT PROJECTS & PRODUCT DEVELOPMENT

Waflo - Customer Retention Automation Platform

2024 - PRESENT

Node.js, Express, SQLite, Baileys, Docker Compose, Cloudflare Tunnel

- Built and deployed a multi-tenant SaaS platform that automates WhatsApp customer follow-ups for repair shops and electronics businesses.
- Designed automated workflows sending follow-up messages after 3, 15, 90, and 180 days.
- Implemented tenant isolation with separate SQLite databases and JWT-based authentication.
- Developed cron-based scheduling workflows and WhatsApp session reconnection logic for unstable socket states.
- Resolved Baileys session persistence and connection recovery issues in production-like environments.
- Deployed production-ready infrastructure using Docker Compose and Cloudflare Tunnel.
- Currently used by 6 real businesses in beta phase.

Mini ATS - Recruitment Management Platform

Next.js, TypeScript, Supabase, Tailwind CSS, TanStack Query

- Developed a lightweight applicant tracking system with Kanban pipeline functionality.
- Implemented drag-and-drop candidate management, authentication, database workflows, metrics visualization, and structured recruitment flows.

Fitness Mobile App

React Native, Supabase

- Built a mobile application to help users train from home with authentication, routines, progress tracking, and backend integration.
- Designed a scalable structure for future monetization and community features.

Job Opportunity Finder

Node.js, Playwright, Prisma, React

- Developed a job aggregation and filtering system focused on matching opportunities by experience level and technologies.
- Built automated scraping workflows and frontend filtering tools.

Personal Finance App

TypeScript

- Created a personal finance management application to track expenses and improve financial organization.
